Measuring for French doors is easy, but very important. As with all plantation shutters, measuring is half the work. The best way to ensure that your plantation shutters look as good as possible is to take your time and do a good job measuring. This form does not order your shutters, but simply is a way for you to get us all your measurements and help ensure that all measurements have been taken.

*Fill in both pages of this form. Not all measurements will apply. Please put "N/A" or "Not Applicable" to any measurements that do not apply. All measurements should be in inches, accurate to the 1/16".*

Name: \_\_\_\_\_

Email: \_\_\_\_\_

Phone: \_\_\_\_\_ Fax: \_\_\_\_\_

### Plantation Shutter Type:
